**IMPROVING MATERNAL HEALTH**

People of color are 3 times more likely to die from complications during or soon after pregnancy than their white peers\(^1\). KY must implement policies addressing racial bias in medicine and increasing access to doulas.

**THE PROBLEM**

The U.S. has the highest rate of maternal mortality among the world’s wealthiest countries\(^2\). Maternal mortality rates are 3 times higher for people of color and nearly 4 times higher for African-Americans, compared to their white peers\(^1,3\).

**United States**

- **23.8**

**Kentucky**

- **22.9**

**Infant Mortality**

Black infants are 2x likelier to die before their 1\(^{st}\) birthday than non-Hispanic white infants\(^6\).

**U.S. Maternal Mortality Rate**

Maternal and infant mortality happens to pregnant people of color of all incomes\(^1\).

**Pregnant People of Color**

Mortality rates are higher for all people of color due to structural racism in healthcare\(^6\).

**THE SOLUTION**

The ACLU of Kentucky supports House Bill 138, the Maternal CARE Act, which would address racial disparities in maternal mortality in 3 key ways:

1. **Address racial bias in medicine by requiring implicit bias training**
2. **Allow patients to pay for doula services with Medicaid**
3. **Establish transparent process to review maternal and infant deaths**

**WHAT IS IMPLICIT BIAS TRAINING?**

Implicit bias is an automatic, subconscious feeling or attitude about a certain group of people. It does not come from a place of negative intent, but results in unequal treatment. Implicit bias training teaches people how to identify these patterns of thinking and change them to eliminate discriminatory behaviors.

**WHAT ARE DOULAS?**

Doulas inform and advocate for pregnant people before, during, and after birth. Doulas provide individualized and culturally-specific education about pregnancy and childcare, and ways to reduce stress and promote a healthy pregnancy. They visit patients at home and are present during delivery to ensure the patient receives the care they need.
